# eBook User Guide

## Contents

- eBook Overview
- EASI Definitions
- CBSA Geographic Assignments

---

## **eBook Overview**

The Demographic eBook has been designed to provide both a quick reference guide to our most commonly requested variables as well as providing printable reports for areas of interest the user.

Some users will find the font size quite small, and this design choice was driven by our desire to give you printed reports with the most possible data per page. To this end, you will find some reports designed in Portrait mode and longer reports designed in Landscape mode.

## **Report Layouts**

The Demographic eBook is organized by Geography (i.e. State Reports, or County Report), States within Geography, and the Reports with State.

## **Viewing Reports**

The Demographic eBook will be most easily read when you select Single Pane from the View->Page Layout menu. You might want to select View and Zoom to increase the level of your reading comfort.

## **Printing Reports**

Each report is numbered individually (beginning with page 1) to provide you with the most professional looking print output possible. However when printing you must take care to select only the Current Page, or the range of pages (found at the bar of your Reader) that correspond to the eBook Report you want to print.

## EASI Definitions

### Data Overview

Most of the Data Elements in the EASI Executive Demographic eBook speak for themselves. All eBook variables are 1/1/2020 EASI Estimates except where specifically noted.

There are however, several variables which, over time, have generated more questions for us than most, so we will provide a brief discussion of those below.

### Total Population and Race

Total Population is defined as the sum of the 6 racial population groups:

- White Alone
- Black Alone
- Asian and Pacific Islander
- American Indian and Alaska Native (AIAN)
- Other Race Alone
- Two or More Races

Hispanics are considered, by the Census Bureau, as an Ethnic group, not a Racial group and is presented separately with White Non-Hispanic. Hispanic can represent White Hispanic, Black Hispanic, Asian Hispanic, or Other Hispanic. The census designation is a result of respondee self reporting.
